What I'm trying to achieve here is add to the timepicker an ability to write only hours and minutes, eg 12.22, 23.22 etc. And I need to display it in the same format that I'm getting from the database. I have searched a lot and have found that in the official timepicker documentation, there is a way to set custom format. I tried to find it but it was a bit tricky. So I'd like to know how to do it. If it's a bit too hard to find, I'd be happy to request a code or piece of code. Anyway, thanks a lot in advance. A: how to do it. I tried to find it but it was a bit tricky. I'm afraid there is no other way than using a custom implementation of JSF Component as below. import java.text.ParseException; import java.text.SimpleDateFormat; import java.util.Date; import javax.faces.application.FacesMessage; import javax.faces.application.FacesMessage.Level; import

I guess I could reset to factory settings. But then I lose all my patches that I made. Any suggestions?. Thank you!.. . Also.. ?.. ?.... How do I get that serial number?.. . . . . . . . . . I do have a receipt that I paid with along with a coupon from a hardware store. I just hope I'm not going to be out a whole lot of money. But..
