Free formats of Electronic version available for download via various formats.The Evolution of Chemical Weapons in the Twenty-First Century Abstract Historically, conventional weapons have been the biggest contributor to international arms control agreements. Therefore, in the twenty-first century conventional weapons have a tendency to become the main part of these. The subject of this paper is the evolution of chemical weapons in the twenty-first century. Its theoretical background is the theory of balanced equation of growth. The main focus is on a comparative analysis of the state of chemical weapons as the technology of chemical weapons changes. The problem of the nuclear-chemical balance in the twenty-first century is analyzed.Archive for April, 2010 I am sitting here looking at the beautiful man that I love and I am really thinking about the amazing journey we have been on. I think about how wonderful it was to get engaged and how much better it is to be married. I think about what our life will be like and wonder if it will be anything like now. Being with the man I love and watching his smile and hearing him laugh are the best parts of our lives. I don't know what the rest of our life will look like
